Finally You Will be Able to Manage Your Entire WORPLACE SAFETY PROGRAM!

- » After partnering with numerous organizations in various industries from placement agencies to the food industry over the last 21 years RTS Consulting Inc. has come up with the answer. Over the years while developing environment, health and safety programs we have been able to identify the key elements which every organization must maintain to put their organization on the path of reduced accidents, improved moral, effective supervision and superior management of your organization.
- » We have seen many organizations turn the corner and begin the rewarding journey of improved health and safety only to veer off the road once unexpected challenges and obstacles have gotten in their path.
- » How do organizations stay on the road to success and avoid the pot holes and obstacles on the road?
- » The way to out maneuver and avoid these issues is to be prepared for them. Having a systematic process that identifies the possible issues and establishes methods to overcome them.
- » That is what the Turning Point Management System will do for your organization.
- » We have the map to direct you. Not only that but with our Guardian Prevention System (GPS) we will constantly know where you are in relationship to where you are going to ensure the most efficient rout. The ultimate GPS to reach your destination.

- » We do not just sign you up to our program but we intentionally monitor and report the status of your progress towards your destination.
- » We do not just provide reports on training and which employees have completed required what topic and how long it took them.
- » We identify what safety programs, training and inspections are required for your culture to meet your goals and then monitor which programs are being implemented and what hazard assessments are being incorporated etc. We continually assist you and direct you in the steps to ensure you stay on track. We will be right there with you guiding and assisting you like no other GPS and if you go off course we will quickly determine the best way to get back on track to your destination.
- » We assist you with a complete safety management program. From the initial hazard assessments and safe operating procedures to the procedure development, objectives inspections, accident reports and employee incentive program.
- » We assist you through the whole process so you are assured not only that you are in compliance but heading towards your goals in a tangible way.

If you know what challenges you will face on the road to zero accidents and improved health and safety your journey will be a success.

SOME OBSTACLES TO BE WARY OF ARE:

Time, emergencies, worker and supervisor motivation, fluctuation in work demands, changing legislation, competition and priorities

GUARDIAN PROTECTION SYSTEM
